Figure 1 consists of 11 subplots, labeled (a) through (k), each showing a different relationship between a variable and the number of children (0 to 10). The variables are:

- (a) Age (years): Shows a peak around 4 children.
- (b) Age (months): Shows a peak around 4 children.
- (c) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (d) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (e) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (f) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (g) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (h) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (i) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (j) Age (years) for different birth cohorts: Shows a peak around 4 children.
- (k) Age (years) for different birth cohorts: Shows a peak around 4 children.
